

GEI GREEN ECONOMICS INSTITUTE

15th Annual Green Economics Institute's Conference

Green Economics Survival Solutions for the Crises: Climate, Economy and Biodiversity Loss

24th - 26th July 2020,
Online on Zoom platform

www.greeneconomicsinstitute.org.uk

Survival Solutions to The Crises, Climate, Biodiversity, Economy and Health.

Friday Conference Day 1 Timetable 24th July 2020

Exploring and recalibrating our place in nature.

UK Times	SESSION DETAILS	SPEAKERS/ HOSTS
9.00-9.30	Technical set ups and people set up And enter the webinar. Welcome to everyone and housekeeping.	
9.30-10.30	Welcome Session - Opening Plenary, Webinar *Recalibrating our relationship with nature. Avoiding future pandemics, and zoonotic diseases, by behaving decently and with respect to other species, and to nature, and not invading or destroying their habitats -we are temporary visitors on earth, not stewards, colonizers, rapists or owners. Can we ever own the earth? If we destroy our planet- do we have the right to go and muck up another one?	Dr Vandana Shiva, India, Tracy Marchioness of Worcester, farms not factories, Dr Djana Bejko, former Minister of the Environment Albania, Ministry of Energy - Environment Director,

		Professor Asia Mohammed IPBES and UN Climate, Economist, Sudan.
10.30	22nd century Utopian dreams. Visions revived-global reset. Where are the battle lines drawn today? With the fish predicted to boil in the sea, arctic heatwaves -and the climate warmer than for 1000s of years, over 400 ppm co2 and predications of 10 -15 degrees of warming- business as usual is over- when do we finally say- enough- the public want some changes. What will those changes look like? We debate them together in smaller groups- sharing perspectives. What we share in common. Ice breaker and interactive sessions - In Break Out Rooms	GEI Team Hosting MK, EA,Sm, KJ, ML,
11.00	Break Also an optional visit to bird watching together	Global Bird watching from our homes In our 'Natures space' break out room
11.15-11.45	Water and the Oceans, Marine Life on Earth; Without water nothing survives on earth and yet we are creating deadzones, pollutions, plastic, instead of vibrant seas full of life. Climate change is creating droughts, floods, sea level rise. We are children of the water, but we haven't understood this. We need to bond a new relationship with the water on earth, our blue gold, and we need to understand it fast. Plenary presentation of video and film etc and project on the oceans and action points on what the world must do and the implications for us if we get this wrong globally and presentations and Q and A	Martin Koehring of the Economist, Ewa Sufin Board of the Green European Foundation Brussels, former consul of Poland
12.00	Humans and our place in nature explored: The Mali Elephant Project. This presentation will explore how a focus on finding ways for humans and elephants (who are a proxy for biodiversity) to thrive together, has reversed ecosystem degradation as well as improved livelihoods. Social cohesion, youth unemployment, reduced radicalisation and provided insights for stabilisation during lawlessness and insurgency. Plenary Keynote speech	Dr Susan Canney (UK) University of Oxford
13.00 – 13.45	Woodland Special: virtual live visit to woodlands and primal ancient forest in Lithuania and Poland with cinematographer 'Ancient Woods' breath taking and award winning film	Mindaugas Survila (Lithuania) Biologist and film director. Norferyanti Kamarudin Malaysia, forestry expert and author of our Asia book
13.45-14.00	Break	
14	Diversity, holism, multi and inter disciplinary modes to solve our crises. Hidden voices: We now know its women that put men on the moon. Sustainability and the economy must encompass Smart Women and the need for womens' leadership and soft power to science and technology and innovation.	Keli Yen Director Global Greens, Dr Vandana Shiva.(India), Bianca Madison -Vuleta
15	Women as Green Economists and Financiers- women are increasingly being understood to be missing from economics. Text books are often men only, academic journal editors are mainly men, men appoint men, women's economics perspectives are fascinating, and so this panel will explore economics as it will be in the future – but from diverse perspectives, and voices not always heard in the mainstream.	Professor Doaa Salman, Egypt. Professor Bozena Ryzszaska, Poland, Green Economist, Professor Asia Mohammed, Sudan Professor Maria Madi, Brazil

16	The Future is African: The seat of human learning, young Africans are mapping out their future, solving the problems of the pandemic Rethink -reset the world. Our future. Understanding the civilisations, science and history out of Africa, its part in all our histories and in all our futures.	Dorothy Nalubega, Uganda GEI, Anjikwi Mshahbawala, Nigeria, Dr Sadiq Okoh Nigeria- author of our books- Green Economics Post Paris Africa Dr Ndongo Sylva, Rosa Luxembourg Foundation, Government Advisor Senegal.tbc
17	The Uses and Abuses of Law No.1 Do trees have standing? Can you really own anything? Who owns your body, your genetic material, your health, your data, your indigenous rights, seeds, patents, your art, your music, your soul?	Paul Powlesand, Specialist in the legal rights of nature and also Extinction Rebellion. Agneta Granstroem, Indigenous Sami, (Sweden). Dr Vandana Shiva (India) Norferyanti Kamarudin.(Malaysia)
18	The uses and Abuses of Law No. 2 How do we use the law to help us- and how do we call out unjust or unhelpful law and institutions? Drawing on slavery, black lives matter, the debate about the police, the debate about indigenous land, IT, technology, patents- we discuss with experts what the role of the law needs to be and why this campaign is an integral part of Green Economics Practice. Q and A	Dr Adrienne Barnett, (UK and South Africa) Family Barrister, and former Lawyer ANC. Michelle Gale, (USA) Human Rights Law. Agneta Granstroem, Sami (Sweden). Maria Fernanda Madi (NL and Brazil) TBC. Margarita Nieves tbc
19.00	How the whole economy has been skewed in the past and now needs a reorientation towards our future and survival: Stranded assets and investment changes and the implications for the economy and jobs: stopping off shore investments.	Professor Thomas Duncanson, USA, Professor Maria Madi, Brazil. Professor Simon Mouatt Hans Kåre Flø: Special adviser at Tekna, president of the Industrial board of The Norwegian Academy of technological sciences.
20	Post Oil Economic and Financial Challenges No. 1 Germany, Nigeria, Norway, China - The main challenges and opportunities and how fast do we need to go to save the climate so its suitable for humans to live in? The industrial economy has been totally based on fossil materials, like coal, oil and gas, for energy and industrial materials (like plastic). Now we need a total reorientation away from fossil resources. How to avoid unemployment, social injustice and stranded assets and accomplish the necessary scale down of fossil investments in both oil consuming and oil producing countries? The proposed green strategy to deal with income disparity, issue in China.	Professor Peter Yang, (China and USA) our delegate to the UNFCCC climate conferences. Nigerian Oil Ministry- Carolina Aguti,(Nigeria) TBC Sadiq Okoh (Nigeria) Author of Nigeria post oil, Hans Kare Floe Norway tbc
21	Build Back Better- -Responses to the Pandemic -economics, climate, social and environmental justice solutions. Building a just transition for everyone. Housing, buildings, energy, transport, heating, embodied carbon, supply chains. The need for local economic development during and post covid 19. Green Investment and Savings. Climate Finance	Professor Natalie West, IIM Shillong (India) Professor Ndongo Sylla, Senegal Government Advisor and Rosa Luxembourg Foundation. Professor Maria Madi (Brazil).Finance expert.

		Ewa Sufin (Poland)
22	Trade Practices – Realignment of Post WW2 consensus. What is the role of China, Japan or India on the international stage? And the emerging economies of Africa? How are they influenced by their history and how will the future play out?	Professor Peter Yang (China and USA), Dorothy Nalubega Uganda. Michelle Gale Land issues.
23	For the Americas Time Zones: candle lit sessions in Europe! Economics: Economics is cause of our current crises? Economics needs to be the cure for our current crises? How do we change it? The power is in our hands. Theoretical changes we know we can make- Green Economics is NOT business as usual-What are the issues ? The theoretical back grounds and distinct- non business as usual of green economics-	Michelle Gale Peter Yang Jack Reardon Miriam Kennet Volker Heinemann And others
	How Green Economics is being used and Implemented around the world and the implications for implementation of the New Normal in the Global and Local Economy and our survival What are the differences in approaches and practicalities of doing things differently? After the lock down, and after Covid, and into the climate change emergency era- and the biodiversity catastrophe, and the plastic oceans- how will our economies really look?
